

- 00:02

Key fobs provide access to the instructional technologies

- 00:05

found in the classrooms across University of Waterloo campus.

- 00:08

Faculty will receive a key fob in their instructors kit and

- 00:12

they can be registered at this address.

- 00:16

To access the instructional technologies, first place the

- 00:19

key fob on the Holder located on top of the podium.

- 00:23

The LED next to the Holder will change from red to green. This

- 00:27

indicates that the podium is now

- 00:29

unlocked. The touch screen will also switch from a locked screen

- 00:33

to a user screen and the cabinet doors will unlock. The

- 00:38

instructional technologies can now be used.

- 00:41

When the key fob is removed from the Holder, the lead changes to

- 00:45
a blue color. This indicates that the podium will lock in
- 00:48
about 30 seconds. If a key fob is not placed back in the
- 00:51
Holder. After 30 seconds the LED will switch back to read.
- 00:55
The touch screen will go back to the lock screen and the
- 00:58
cabinet doors will lock.
